

International Session

The 10th Annual meeting of Japanese Society of Limb Salvage & Podiatric Medicine

Date Thursday, July 12, 2018 **Time** 17:10 - 18:30

Venue Royton Sapporo 2F Regent Hall

Chairman **Nobuyoshi Azuma** (Department of Vascular Surgery, Asahikawa Medical University)

Norihiko Ohura (Department of Plastic Surgery, Kyorin University)

Opening remarks

All of you know that diabetic population has been growing and growing globally, especially in East Asia. Although we need to prepare for increasing diabetic foot problems, we don't have podiatrist as established specialist in the most of Asian countries. Therefore, we need to ask the knowledge and techniques of established specialists from Western countries, and also seek the ways how to salvage feet in countries without podiatrists.

In this international session, we invite world-wide famous specialists including vascular surgeon, plastic surgeons, and podiatrists from several countries.

We are looking forward to knowing each countries situation regarding medical service for foot problems and we will discuss how to fight with foot problems,

Nobuyoshi Azuma, MD, PhD.

INS-1 **Experience of Multi-disciplinary Approach to Limb Salvage in a Vascular Unit in Singapore**
Steven Kum (Farrer Park Hospital)

INS-2

Diabetic foot reconstruction and new innovations using super microsurgery
